DIGITAL FORENSICS LITE

LIVE DEMO: UBUFAKAZI.NETLIFY.APP

ALL DEMO DATA IS FICTIONAL.

THE PROBLEM

Scam victims in South Africa are left alone after the crime

Evidence is messy: screenshots on a cracked phone, chats get deleted, no proof nothing was edited

Police and banks are slow or hard to reach while money moves through mule accounts within hours

Every victim reports alone, so nobody sees that one bank account has scammed many people

R2.4 BILLION

LOST TO DIGITAL BANKING CRIME IN 2025

(SABRIC)

6%

OF SCAM VICTIMS REPORT TO AUTHORITIES

(GASA 2026)

WHO IT AFFECTS

SHA-256

C3E2 9F7A 4D8B 2E1F ...

SCAM VICTIMS

ordinary South Africans who have just been scammed, especially young job seekers, online shoppers and older adults

SAPS INVESTIGATORS

investigators who receive weak, incomplete cases

6A9F 2B7E 4C1D 8E3F
87C2 1A9D 3E6F 488C
D1E7 9F0C 6A2B 9C4D
E3F6 7B1A 9C2D 4E6F ...

BANK FRAUD TEAMS

fraud teams who get reports too late to freeze money

MULTILINGUAL VICTIMS

victims who speak isiZulu, isiXhosa, Afrikaans or Sesotho and struggle with English-only processes

EVIDENCE IN. PROOF OUT. JUST 60 SECONDS.

01 VICTIM SUBMITS EVIDENCE

chat screenshot, proof of payment and any links

02 SYSTEM ANALYSES

evidence is locked, details extracted, timeline built

03 CASE FILE CREATED

statement in your language, fraud report and case pack

04 SCAM FINGERPRINT MATCHED

links victims by account, number, link and message script

05 STRONGER TOGETHER

1 → 7+

ONE VICTIM GETS IGNORED.
SEVEN VICTIMS IS

A SYNDICATE.

EVIDENCE LOCKED

Every file gets a SHA-256 fingerprint and timestamp the moment it's received

EXTRACTED DETAILS

Bank accounts, phone numbers, links and amounts pulled automatically

SCAM TIMELINE

Events sequenced into a clear timeline of how the scam unfolded

YOUR LANGUAGE

Statement generated in English, isiZulu, isiXhosa, Afrikaans or Sesotho

REPORTS READY

Bank fraud report and PDF case pack ready for SAPS

WHY IT IS SECURE

TAMPER-EVIDENT EVIDENCE

SHA-256 fingerprints show if any file changes later

PRIVACY BY DESIGN

scammer identifiers stored only as keyed HMAC-SHA256 hashes, never readable numbers

DATA STAYS ON DEVICE

victim names, chats and files never leave the device in the MVP

VICTIM CONTROL ALWAYS

reports join the network only with the victim's consent

ENTERPRISE-GRADE PROTECTIONS

strict content security policy, no trackers or third-party scripts

hosted in a South African cloud region, encrypted evidence, independent RFC 3161 timestamps, POPIA compliant

OUR MVP IS ALREADY LIVE

ubufakazi.netlify.app

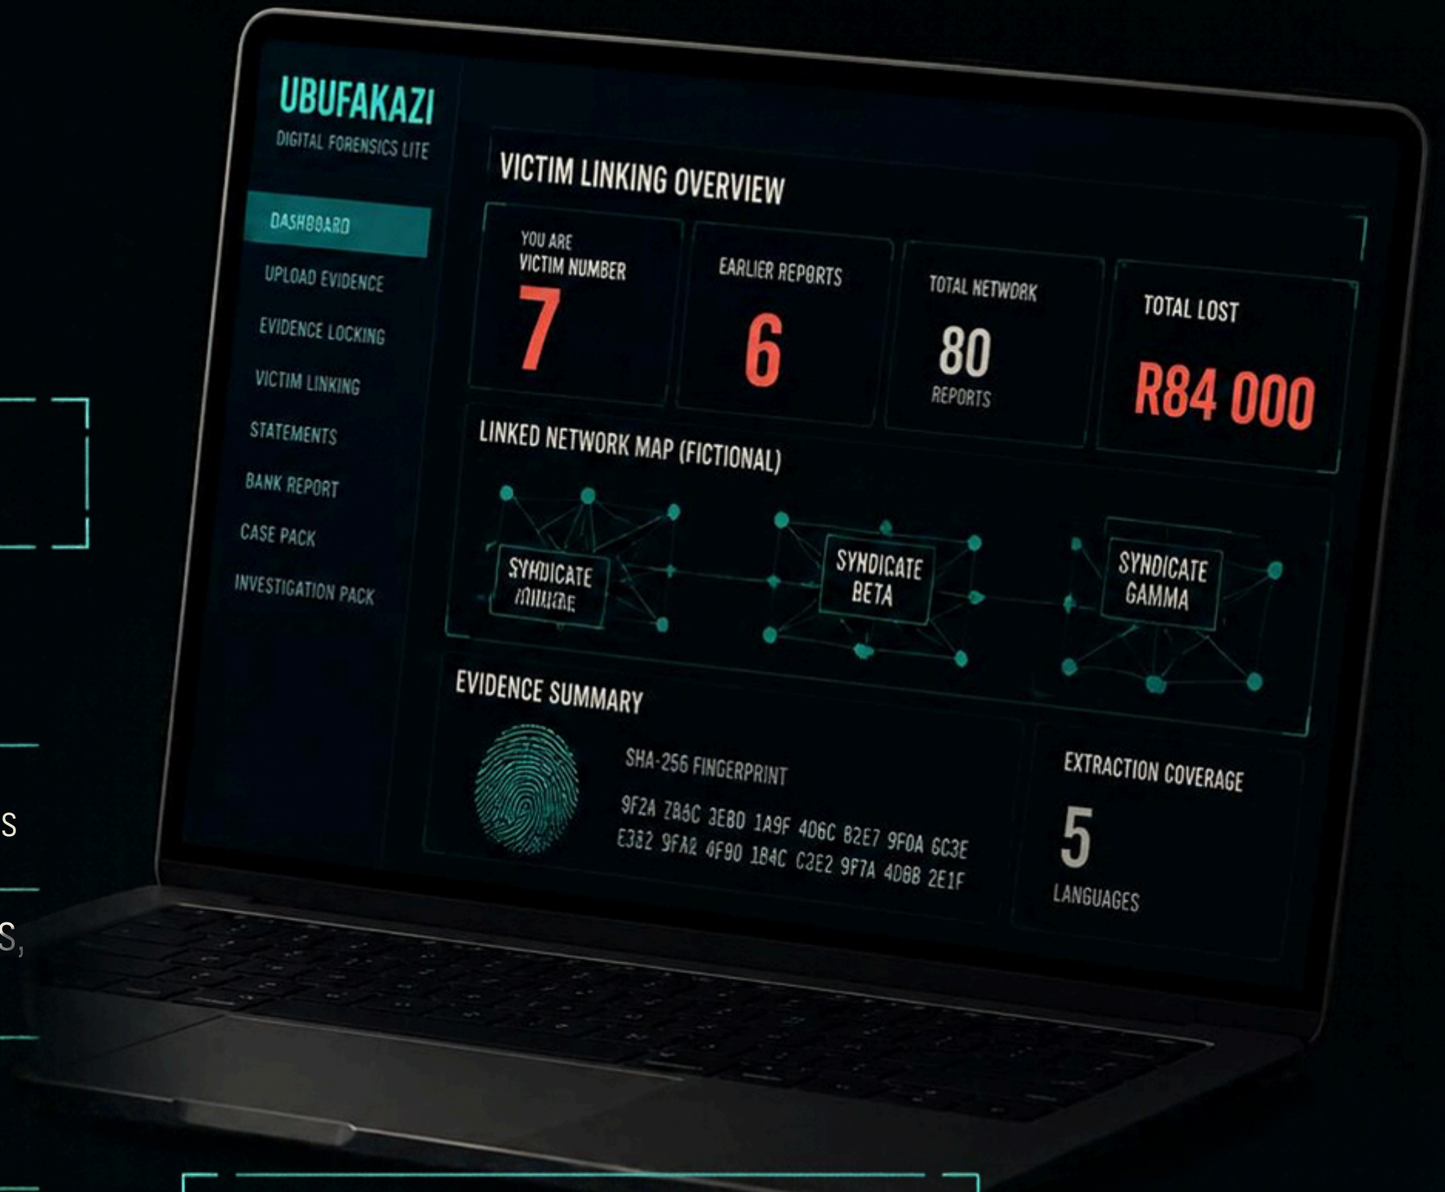

UPLOAD EVIDENCE WHATSAPP CHAT EXPORTS, SCREENSHOTS AND PROOF OF PAYMENT

EVIDENCE LOCKING SHA-256 FINGERPRINTING AND EXTRACTION OF SOUTH AFRICAN ACCOUNT, PHONE AND RAND FORMATS IN FIVE LANGUAGES

VICTIM LINKING YOU ARE VICTIM NUMBER 7 – 6 EARLIER REPORTS, R84 000 LOST ACROSS AN 80-REPORT FICTIONAL NETWORK

CASE PACK OUTPUTS STATEMENTS IN FIVE LANGUAGES, BANK REPORT AND DOWNLOADABLE PDF CASE PACK

INVESTIGATION PACK FAKE SCAMMER WEBSITE, SOCIAL PROFILE, BANK LETTER AND A 70-CASE TEST PACK FOR JUDGES

WORKING PROTOTYPE.
ALL DEMO DATA IS FICTIONAL.

TWO-DAY BUILD PLAN

27–28 OCTOBER | THE GALLERIA, SANDTON

	DAY 1 27 OCTOBER	DAY 2 28 OCTOBER
THABANG ENGINEERING	Telegram bot and FastAPI backend on Render, server-side HMAC and FreeTSA timestamps	Connect and deploy end to end, security hardening
AMANI AI & EXTRACTION	Gemini AI extraction for screenshots and messy chats, rules as fallback	Accuracy testing on the 70 test cases, statement quality
SHAUN PRODUCT & PLATFORM	Supabase shared victim network with consent flow	Investigator dashboard, case pack polish, demo rehearsal

KEY PARTNERS

SABRIC and banks
SAPS cybercrime units
The Cyber Helpline
telecom networks
(through legal RICA requests)
universities
CSIR

KEY ACTIVITIES

secure evidence processing
AI extraction in SA languages
maintaining the Scam
Fingerprint network
partnerships
awareness campaigns
POPIA compliance

VALUE PROPOSITIONS

victims get a case file
in 60 seconds in their
language and learn they
are not alone
police get tamper-evident,
structured evidence and
syndicate links
banks get faster, complete
fraud reports and early
mule-account alerts

CUSTOMER RELATIONSHIPS

free self-service
automated step-by-
step guidance
human support
through partners
opt-in alerts when a
scammer is linked

CUSTOMER SEGMENTS

scam victims in South Africa
(job seekers, online
shoppers, older adults)
SAPS investigators
bank and fintech
fraud teams
victim-support
organisations

KEY RESOURCES

hashed Scam Fingerprint database
multilingual extraction engine
secure SA cloud infrastructure
team skills
public trust

CHANNELS

WhatsApp and Telegram bot
website
referrals from bank fraud lines
and SAPS stations (QR posters)
The Cyber Helpline
community radio
campuses and TikTok

COST STRUCTURE

SA-region cloud hosting
AI API usage
security audits
language checks
support staff
legal and POPIA compliance
awareness campaigns
free tiers keep the pilot
near zero cost

REVENUE STREAMS

always free for victims.
banks and fintechs pay for
syndicate-intelligence alerts
and a structured fraud-report
API insurers
government and NGO grants
corporate social investment
and sponsorships
