UBUFAKAZI | DEMO EVIDENCE KIT

Try it with real files

Fictional scam evidence you can upload to ubufakazi.netlify.app

How to use

1. Open the site and go to "Tell us what happened".
2. Click "Upload chat export (.txt)" and choose a case's chat file.
3. Click "Add files" and choose that case's proof-of-payment PDF(s).
4. Click "Build my case file".

Case 1 | Lerato | Fake job offer

- case1-lerato-whatsapp-chat.txt
- case1-lerato-proof-of-payment-1.pdf, -2.pdf
- case1-scam-website-screenshot.png, case1-recruiter-profile-screenshot.png
- case1-bank-confirmation-letter.pdf (the scammer's "proof we are legit")

Expect: "You are victim #7". 6 earlier reports, R84 000. Linked by the same bank account, even though the phone number is new.

Case 2 | Sipho | Same scammers, new number and new account

- case2-sipho-whatsapp-chat.txt
- case2-sipho-proof-of-payment.pdf

Expect: still linked to the same group, through the website link and the copied message script. This is the Scam Fingerprint: dumping a number or account doesn't hide them.

Case 3 | Naledi | Marketplace scam, a different scammer

- case3-naledi-whatsapp-chat.txt
- case3-naledi-proof-of-payment.pdf

Expect: "No earlier reports match this scammer yet". Click "Add my report" so the next victim of this scammer gets linked to Naledi.

Tip

Do case 1, click "Add my report", then do case 2: it becomes victim #8.
Use "Reset demo data" at the bottom of the site to start again at #7.
The scammer's fake website and profile are on the site: ubufakazi.netlify.app/scam-demo/

Everything in this kit is fictional.

"Ubuntu Trust Bank" is not a real bank. All people, numbers and payments are made up for the demo.
